

ZARATHUSHTRIAN SCIENCE OF KHAETVODATH

What is the truth as taught in the Zarathushtrian Mystical Science?

Ahura's creation on earth has four kingdoms: human, animal, vegetable and mineral. Every member of each of these four creations is related and connected with the members of the other three.

A human being is a unit of Ruvaan (the soul) housed in the physical and nonphysical body. That particular unit has its own particular fragments divided and housed in the human of the opposite sex and in each of three: animal, vegetable and mineral kingdoms.

This process of the division of one unit of Ruvaan is a part of a Divine plan of Ahura called Ahunvar. (Our 'Yatha Ahu Vairyo' prayer is a verbal transmutation of Ahura's plan).

The aim of life

The aim and object of the grand division is to dissolve certain bands of evil originally attached to the Ruvaan. In a human being some of the bands are already converted to "good", called Gava, and are embedded in the non-physical body, called 'Keherp'. The rest of the evil which is not yet converted is interwoven with Gava in the physical body. The physical body is in charge of the five senses. The controlling of these senses is the essential requirement for the dissolution of the evil. The way of the controlling is taught by Daenaa (Dharma)

The way of life

As a human being treads on the path of Daenaa, the evil in the body dissolves. As the evil dissolves, the fragments of the Ruvaan housed in a member of the opposite sex and scattered in the other three kingdoms come nearer to that particular human. This by itself is the spiritual evolution of that human.

First, the Ruvanic fragments of the three lower kingdoms merge with the human. That is then followed by the merging with the Ruvaan of the opposite sex. Thus the humans become one with the previously divided units of their Ruvaan. When all merge, it is called "Khaetvodath". That is why the Mazdayasni Daena is called "Khaetvo-dathaam" in our Kushti prayer (Jasa meyo Avanghahe Mazda...)

So Darwinian evolution is a myth and a hoax. The smallest animal, the smallest leaf and the smallest particle of matter has a fragment of Ruvaan in it. That means it has life, it is alive. It awaits its merging with the principal human Ruvaan, whose responsibility it is to attract the fragments through the life of Daenaa. The humans on earth have that responsibility. That is why the earth is the Evolutionary center of all souls. There is no chance, no accident, no struggle for existence, no survival of the fittest.

Not the fittest but the meekest shall evolve towards God. For meekness is the other name for selflessness. And selflessness and humility - Vohuman and Armaiti - are the first steps on the path of Evolution to God.

Darwinian evolution is the product of devil's workshop. Spiritual Evolution is divine aim of the human. Chance and accident are the pass-words of devil. Plan and Aim flow from God.
